

Richardson Associates (1993) Limited

- Health Care Facility - Project Summary -

Project Name: Prince county Hospital, Summerside, Prince Edward Island

In April 2004, the Prince County Hospital moved into its new location in Summerside. The Prince County Hospital (PCH) at 18,000 m² in size is the province's second largest acute care facility and provides a wide range of inpatient, outpatient and community-based health and wellness services. The hospital is a 102 bed acute care facility providing services in surgery, internal medicine, obstetrics, pediatrics, ENT, psychiatry, radiology, pathology, endoscopy, anesthesia, rehabilitation, oncology, and emergency.

The approximate construction cost of the facility was \$40,000,000 with the electrical component being approximately \$6,000,000.
